***Allowable Subject Matter***

1. Claims 75-108 are allowed.
2. The IDS filed 6/7/2007 has been considered. The IDS filed 6/30/00 has been included again in order to record the examiner's consideration of the "M" and "N" references which were initially crossed out and not considered for purportedly lacking copies. A review of the file reveals that the copies were indeed properly filed on 6/30/2000.
3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- Specification page 2 line 19, the blank serial number has been replaced with --09/605,732--.
4. The following is an examiner's statement of reasons for allowance:  
Independent claim 75 calls for:
    - determining a gambling history of a player
    - selecting the player to receive a survey *based on the determined gambling history*

- conducting a survey via a slot machine and receiving a player's response
- determining compensation for the response

It is generally accepted and explicitly taught by Raven et al (US5429361) and Gaming Technology Review (3/29/2000) that casino players (gamblers) are identified and tracked at various gaming automated machines including slot machines and that they may receive "comps" and other benefits based on their determined gambling history. It is also mentioned in both that players may interact with the gaming machines. Gaming Technology Review states [6<sup>th</sup> para on page 6 of 17] that the gaming machine asks the targeted player how he wants to receive his comp. While the examiner has stated that any prompt for information (such as in this situation) can read on a "survey" as claimed, applicant has argued against such a proposition. It is also pointed out that the claim language calls for compensation *for the response* which is consistent with applicant's disclosure and conventional survey practices that there is value in the consumer's opinion(s). While Gaming Technology Review might issue a survey (where do you want your comp?), the compensation of Gaming Technology Review is *for the gambling history* rather than *for the survey response* (as claimed). Lastly, while compensation for survey responses have been noted (see Plainfield), there is no motivation for one of ordinary skill to selectively present a survey at a slot machine to certain players/gamblers based on their determined gambling history and further to instruct the slot machine to compensate them for their valuable survey response(s) received. Independent claims 107 and 108 include the same critical limitations, presented as a computer medium storing instructions to direct a processor to perform

the method as well as an apparatus with processor and computer code to direct the processor to perform the method. These claims are allowable for the same reasoning.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
